

IT & Cybersecurity Infrastructure Operations Manual

Table of Contents

Authored by: Travis Currier, Timothy Powell, Josue Quinones (Consultants); Noah Whalen (Project Manager)
Sentinel Ridge Security · Pensacola Christian College Senior Capstone · April 2026

This document is a sanitized excerpt (table of contents only) from a 100+ page operations manual produced for an academic capstone engagement. Gulf Coast Family Dental is a fictional client; specific environment details have been redacted from all public materials. Full deliverables available on request.

Contents

1 Introduction	1
1.1 About Sentinel Ridge Security	1
1.2 Purpose & Scope	1
1.3 Intended Audience	1
1.4 Compliance Alignment	1
2 Environment Summary	3
2.1 Physical Server Infrastructure	3
2.2 Endpoints	4
2.3 Specialized Software Overview	4
3 System Architecture	7
3.1 Network Topology	7
3.2 IP Addressing Scheme	7
3.3 Domain Structure	8
3.4 Redundancy & Failover Design	8
4 Network Design & Implementation	9
4.1 Network Layout	9
4.2 VLANs / Segmentation	9
4.3 Communication Flow Between Systems	9
4.4 Wazuh SIEM Network Integration	11
4.5 External Connectivity	11
4.6 Remote Access	12
5 Server Configuration	13
5.1 Configuration Details	13
5.2 Storage & Memory Allocation	13

5.2.1 Storage Allocation	13
5.2.2 Memory Allocation	15
5.3 Samba Share Configuration	15
5.3.1 Overview	15
5.3.2 Domain Integration	15
5.3.3 Kerberos Authentication	15
5.3.4 Samba Configuration	15
5.3.5 Share Configuration	16
5.3.6 Filesystem Permissions	16
5.3.7 Security Model	16
5.3.8 Accessing the Shared Folders	16
5.4 Ansible Playbook Documentation	16
6 Database Documentation	17
6.1 PostgreSQL Overview	17
6.2 Database Users & Roles	17
6.3 Table Structures	17
6.4 Data Types & Constraints	17
6.4.1 Numeric Types	18
6.4.2 Character Types	18
6.4.3 Date and Time Types	18
6.4.4 Boolean Type	18
6.5 DBeaver Usage Guide	19
6.6 Backup & Restore Procedures	19
6.6.1 How to Backup the Database	19
6.6.2 How to Restore the Database from Backup	19
7 Security Policies	20
7.1 Active Directory Policies	20
7.1.1 Logon Security Awareness Banner	21
7.2 Password Policies	21
7.3 Account Lockout Policies	22
7.4 Account Naming Conventions	22
7.5 Administrative Account Policy	22
7.6 Role-Based Access Control	23
7.7 Current Security Gaps & Recommendations	23
7.7.1 Third-Party Consultant Accounts	23
7.7.2 Windows Activation Status	23
7.7.3 Patient Portal Security	24
7.7.4 Group Policy Object Description	24
8 Software & Applications	25
8.1 Installed Software on Servers	25

8.2	Installed Software on Endpoints	26
8.3	Website Overview & Status	26
8.4	Application Access Requirements	26
9	Operational Procedures	27
9.1	Logging Into Windows via Domain	27
9.2	Accessing the SQL Database	28
9.3	Routine System Checks	29
9.4	User Account & Access Management	30
9.4.1	Creating a New Domain User Account	31
9.4.2	Adding Users to Security Groups (Onboarding)	35
9.4.3	Removing Users from Security Groups (Offboarding)	38
9.4.4	Disabling or Removing User Accounts	40
9.4.5	Editing Group Policy Objects using GPMC	44
9.5	Nessus Vulnerability Scanner: Running a Preconfigured Scan	48
9.6	Creating a New Nessus Scan	52
9.7	Nessus Vulnerability Scanner Procedures	54
9.8	Nessus Vulnerability Scanner False Positives	55
10	Monitoring & Logging	55
10.1	Logging & Monitoring Overview	55
10.2	Wazuh SIEM Overview	56
10.3	Accessing the Wazuh Dashboard	56
10.4	Log Sources & Windows Security Logs	57
10.5	Alerting & Event Filtering	58
10.5.1	Junk Alert Reduction	58
10.6	Configuration	60
10.6.1	User & Role Management in Wazuh	60
10.6.2	Query, Reporting, and Log Export	60
10.6.3	Real-Time Monitoring & Endpoint	61
10.7	Visibility	61
10.7.1	Log Retention & Storage	61
10.8	Network Logging and Monitoring	61
10.8.1	Manual Searching	61
10.8.2	Automated Searching	62
10.8.3	Email Address Configuration	64
10.8.4	Proxy Configuration	65
10.8.5	Logging and Monitoring Runtime Configuration	65
10.8.6	Changing Sending Email	66
10.9	Incident Response	67
11	Maintenance Procedures	68
11.1	Patch Management	68

11.2 Backup Procedures	68
11.2.1 The Purpose of Backups	68
11.2.2 Handling Backups	68
11.2.3 Verifying Backups	68
11.2.4 Scheduled Backups	68
11.2.5 Backup Retention Times	68
11.2.6 Full Backup Instructions	68
11.2.7 Incremental Backup Instructions	71
11.3 System Health Monitoring	72
11.4 Storage & Resource Management	72
11.5 Updating Domain Controller Policies	73
11.6 Disaster Recovery Plan Reference	73
11.7 Change Management Log	73
12 Troubleshooting Guide	74
12.1 Domain Login Issues	74
12.2 Network Connectivity Issues	74
12.3 Wazuh Agent Issues	75
12.4 PostgreSQL Connection Issues	76
12.5 Common Error Codes & Fixes	77
A Appendix A — User Account & Access Matrix	78
A.1 User Accounts & Roles	78
A.2 Active Directory Group Memberships	78
A.3 Authorized Machine Access	79
A.4 Administrative & Service Accounts	80

End of Table of Contents. Full unredacted manual (100+ pages) available on request — contact tcurrier1819@gmail.com.
